

Amendments to the Specification

Please amend the specification as follows:

Paragraph 37 of the published version of the present application (Charlet et al. US 20050160108) (hereinafter “Charlet”) is the equivalent of paragraph 35 of the application as submitted by Applicants to the Patent Office. Applicants respectfully request that the paragraph be replaced with the following paragraph in the same location.

Indeed, a module of executable code could be a single instruction, or many instructions, and may even be distributed over several different code segments, among different programs, and across several memory devices. Similarly, operational data may be identified and illustrated herein within modules, and may be embodied in any suitable form and organized within any suitable type of data structure. The operational data may be collected as a single data set, or may be distributed over different locations including over different storage devices, ~~and may exist, at least partially, merely as electronic signals~~ on a system or network.
